QUALITY, ENVIRONMENTAL, HEALTH, SAFETY AND ENERGY EFFICIENCY POLICY OF KAZAKHSTAN-CHINA PIPELINE LLP

**«WE ENSURE CONTINUOUS AND SAFE TRANSPORTATION OF OIL THROUGH
THE MAIN PIPELINES»**

Kazakhstan-China Pipeline LLP is a fast growing company that owns a system of main pipelines. The company activity is aimed at oil export and transit to the People's Republic of China, as well as supply of Kazakh oil to the domestic market.

The main strategic goal of Kazakhstan-China Pipeline LLP is continuous oil transportation with a high level of reliability, industrial and environmental safety.

One of the priority strategic directions of Kazakhstan-China Pipeline LLP is permanent technical development based on advanced technologies for constant improvement of customers' satisfaction, prevention of work injuries, minimization of environmental impact and sustainable development of the company.

Management of Kazakhstan-China Pipeline LLP undertakes to constantly improve the efficiency of the integrated management system in accordance with the requirements of international standards ISO 9001:2015, ISO 14001:2015, ISO 45001:2018; ISO 50001:2018 with regard to oil transportation through the main pipelines.

Kazakhstan-China Pipeline LLP has developed a number of effective preventive measures for health and safety at work. The HSE management system of Kazakhstan-China Pipeline LLP for health and environmental protection follows the legal requirements of the Republic of Kazakhstan and international standards.

Kazakhstan-China Pipeline LLP is interested in the efficient energy management and in the improvement of energy performance.

Implementation of quality, environmental, health, safety and energy efficiency policy of Kazakhstan-China Pipeline LLP is based on the following principles:

- Creation of safe work conditions, prevention of work injuries, immediate response to emergency situations;
- Assurance of accident-free and safe transportation of oil through the main pipelines;
- Environmentally safe implementation of production processes;
- Employee training to improve work ethics and professional competence, improvement of safety culture;
- Beneficial cooperation with customers and suppliers;
- Use of modern methods of process management, new technologies and active participation of qualified personnel in all processes;
- Quality fulfilment of contractual obligations in oil transportation and satisfaction of legitimate customer claims with regard to mutual economic interests;
- Strict compliance with legal requirements of the Republic of Kazakhstan, including in the field of industrial and fire safety, health and environmental protection. Planning and performance of work in accordance with current regulations of the Republic of Kazakhstan and requirements of international standards;
- Constant environmental activities, assurance of environmental safety of production, commitment to prevent environmental pollution, rational use of natural resources;
- Building an effective energy management system aimed at improvement of energy efficiency;
- Constant improvement of energy performance in the production activities related to significant power consumption;
- Facilitation of procurement of high-reliability energy-efficient equipment with advanced energy characteristics;
- Unconditional compliance with Kazakh legal requirements and those related to the energy use, consumption and efficiency.
- Improvement of production and financial indicators and implementation of measures aimed at development of the management system.
